universe do not apply when there is "an emergency" Gravity is one of the laws of the universe that applies to all earthly (rescue) environments Rescuers deal with gravity every time they lift a patient, every time they move an object and every time they lower themselves on a rope Rescuers need to understand the relationship of gravity to basic

### **The History of the Atom - Socorro Independent School ...**

He called this the theory of the universe: All matter consists of atoms, which are bits of matter too small to be seen There is an empty space between atoms Atoms are completely solid Atoms have no internal structure Each atom (of a different substance) is different in size, weight and shape Timeline: 1800's Scientist: John Dalton

### **THE SPECIAL THEORY OF RELATIVITY - Macquarie University**

There are no 'signposts' in an otherwise empty universe that would indicate that rotation is taking place By proposing that there existed an absolute space, Newton was able to claim that the masses are being accelerated with respect to this absolute space, and hence that they would separate in the way expected for masses in circular motion

### **CHAPTER 3: CRYSTAL STRUCTURES - University of Notre ...**

Crystal: Space Group By definition crystal is a periodic arrangement of repeating "motifs"( eg atoms, ions) The symmetry of a periodic pattern of repeated motifs is the total set of symmetry operations allowed by that pattern • Let us apply a rotation of 90 degrees about the center (point) of the pattern which is thought to be indefinitely

### **THE PROPERTIES AND STRUCTURE OF MATTER**

• Most of matter in the universe exists as compounds • Compounds can be synthesised or decomposed • Synthesis - combination of elements to form compounds • Decomposition - splitting of compounds into their individual elements • Properties of a compound are different from its component elements

### **Topology - Harvard University**

X2X? There is no universe: given a set A, set  $X = \{B \mid B \in A\}$  We claim  $X \in A$  Indeed, if  $X \in A$ , then  $X \in X$  One solution to the classic paradox | who shaves the barber of Seville? | is of course that the barber is a woman In the Godel-Bernays theory, you are allowed to form X, but X is not a set; it is called a class Axiom III (Pairs)
